Cherie-

Chuck Jr and I have reviewed the amended condition listed on both of the amended water right transfer (68497 and 68498) approval documents and the amended language satisfies our concerns outlined in our petition of reconsideration submitted to IDWR on 4/8/10. Thank you for your assistance on this matter and we look forward to receiving the approved amended water right transfers.

Subject: Bashaw Transfer Amendments

Hi Zach,

We have been reviewing your letter in regard to a condition found in transfer approvals 68497 and 68498. We understand your client's position and are getting ready to issue amended transfers 68497 and 68498 in response. I have attached the transfer approvals to this email. Just to summarize, we changed the condition that states:

This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

To say:

This right in combination with all other rights for irrigation of the lands above shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre, measured at the field, when water is applied via pump and pressurized irrigation system.

I hope that this satisfies your request. Please let me know if you have any questions. I will plan on dropping these in the mail by the end of the week if I don't hear back from you.

Thanks and have a good day!
