1. dnelson 9/19/2006 Claim review

Comment:

The above claim was filed based on a statutory claim. The original statutory claim stated the system was comprised of a pump and sprinkler. On 8/9/2005 Ken Henley went to the property and he found a pond and some irrigation. This exam was incomplete and created more questions than it answered.

I then asked Burke Scholer to do a second field exam of the property. Mr. Scholer found that the claimant did not own the pond, and she did not have any access or control over the pond. The claimant did use the wastewater or overflow from the pond. Mr. Scholer found a 10-inch pipe that was flowing at a rate of 0.04 cfs at the time of the exam. Unfortunately during the Scholer measurement, the water was barely trickling out of the pipeline. Being a wastewater claim, it is the nature of wastewater to go from having more water than you know what to do with to no water at all. Taking this into account, I performed a theoretical manning calculation on the pipe to find the absolute minimum amount of water that the pipe would carry if it were flowing at a full pipe. This calculation shows that if the pipe were full it would carry a minimum of 1.28 cfs. This amount is more than enough to allow the full inch per acre, so I am going to recommend the full inch per acre for the 9.5 acres that are being irrigated for a total of 0.19 cfs.

The stockwater amount will be recommended as claimed with the limitation of 13,000 gallons per day, since an additional fee was not paid for the stockwater portion of this claim.

A letter from the owner who helped her dad irrigate this ground from this water source in 1946 confirmed the priority date. The priority date will be recommended as claimed.

3. dnelson 10/27/2006 Notice of Error Review

Comment:

I received a signed notice of error form from Jessie Newberry stating that the co owner of the right Donna Schmidt was no longer an owner of this claim. I reviewed the file and found a warranty deed showing Ms. Newberry as the sole owner of the property. The original claim listed Donna Schmidt or Jessie Newberry as the owner. With the warranty deed showing total ownership by Ms. Newberry and the "OR" name connector and the signed notice of error Stating that the water right should be in the name of Jessie Newberry, I determined that there was enough information and documentation to remove Donna Schmidt from the water right without a change of ownership form.

4. erushing 4/13/2010 Ownership change split this water right

Comment: Water right 63-4400 has been divided by notice of change in water right ownership which was submitted by Gary and Shirley Strickland. The Stricklands portion is 63-33365. The remaining reduced portion of water right 63-4400 is in the name of Jessie Newbury.
