Subject: Calkins mitigation

Shelley – North Snake GWD cannot find any petition for mitigation membership, or any evidence of assessment for permit 37-21384. Consequently Calkins has probably not satisfied the mitigation condition.

Calkins did obtain mitigation for the two earlier permits by joining North Snake, but his membership does not automatically extend to other water rights at different locations. Each right really must be petitioned separately in order that NSG is properly noticed and has a basis for the assessment. The NSG mitigation assessment is current for sub #2, but is delinquent for sub #1. NSG was not aware that the representative for sub #1 had moved. The contact she has for sub #2 is the same that Calkins gave Jeannie, but when will that change? We should point these things out to Calkins in support of establishing HOAs.
