To Whom It May Concern:

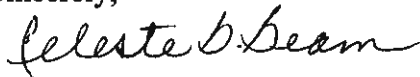

Trout Unlimited has contacted me regarding a transfer or moving of the Glen Bills diversion 250 feet upstream of its existing location because it is a more suitable location for a new structure to be built, and it will not require a fish ladder to be built. In moving the diversion it requires a transfer to be completed because it crosses a $\frac{1}{4}$ - $\frac{1}{4}$ section line.

The existing diversion and the new point of diversion will be located on my property. A trespass authorization is needed for Bill K Shurtleff and Charles W Higham who both have water rights associated with this diversion.

Let this letter serve to show that I give my permission to both Bill K Shurtleff and Charles W Higham or people who are working on there behalf to access the new diversion point for routine maintenance.

If there are any questions in this matter please feel free to contact me at the following number 208-313-3037.

Sincerely,

A handwritten signature in cursive script that reads "Celeste B. Beam".

Celeste Beam.
