Hi Angie,

Attached corrected page 3 and system map of the LCSC transfer adding 15 acres to the POU in the SWSE of section 23 as we discussed.

I have also attached a zip of the shapefile with my best delineation of system irrigation under the water rights identified in the transfer based on analysis of the 2006 and 2009 NAIP Aerial photos. Although there are a few areas that do not appear irrigated in either photo (Water Use = "at risk?"), total irrigation is reasonably close to the combined limit under the rights of 1208 acres. I calculate 1208.4 acres when I include areas outside the 40-acre tract boundaries.

Please review and let me know if there are any issues with my delineation or you need any additional information.
Thanks,

Jason C. Helms, P.E.
