RE: Permit No. 51-12992

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified this water use reported that certain elements of the permit have been developed differently than described on the permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-111, Idaho Code. Before a license can be issued, the permit must be amended to depict the water use as it was actually developed. Based on the examiner's report, the following elements were developed differently than described on your permit:

☒ Point(s) of Diversion

☒ Place(s) of Use

☐ Other

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. You will notice that currently the amendment lists the owner of the permit at the time the field exam was conducted. The Department has received the ownership change dated September 15, 2008, that conveys ownership of the water right to Diamond A Livestock. Once the Application for Amendment form is signed and returned to the Department, the ownership change will be executed and a license will be issued in the name of Diamond A Livestock. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

If you have any questions, please call me at (208) 287-4949.

Sincerely,

Nicholas Van Dyke
Sr. Water Resource Agent
