Application for transfer 75827 was submitted to the Idaho Department of Water Resources as a result of the Lemhi Little Springs diversion elimination project which proposes to eliminate four irrigation diversions on Lemhi Little Springs. The elimination of these four lower irrigation diversions is vital to the success of the restoration project in the Little Springs area. Transfer 75827 proposed to change the place of use and point of diversion along with converting irrigation system from flood irrigation to sprinkler irrigation. The Applicant proposed to divert water rights 74-1574 and 74-1576 from the L-47 diversion; which is downstream from where Lemhi Little Spring Creek and the Lemhi River meet together. However, transfer 75827 was protested by Rand Robison. Rand Robison diverts water out of the L-47 diversion and wants to leave things as they are.

On February 12, 2010 IDWR received a letter from Rand Robison withdrawing his protest if the applicant moved their proposed point of diversion. To resolve the protest the applicant has chosen to move the proposed point of diversion from the L-47 diversion to the L-49 diversion; which is upstream from the confluence of Lemhi Little Spring Creek and the Lemhi River.

As a result of the proposed new point of diversion being changed from L-47 diversion (below the confluence) to the L-49 diversion (above the confluence) the applicant needs to submit an Application for Exchange Water and withdraw transfer 75827.

Part B.-- For an exchange involving only the applicant's water right(s).
