Re: Water Right Transfer Applications- 37-1228E Holman.

Dear Allen,

Enclosed are two water right transfer applications in the name of Carol D. and Eugene Holman Jr. dealing with water right 37-1228E. The Holman's are proposing to split water right 37-1228E. In the first transfer, one acre of 37-1228E is proposed to be transferred to Lot 2C, Townsend Gulch Subdivision within a 31.0 acre permissible place of use with the point of diversion in the correct location at the Holman's Townsend Gulch pump station. In the second transfer, one acre of 37-1228E is proposed to be transferred to Lot 2D Townsend Gulch Subdivision within a 21.0 acre permissible place of use with a point of diversion from a spring on Lot 2D that flows directly into Townsend Gulch Creek.

Also attached are a limited power of attorney document and two checks from Brockway Engineering to cover the cost of each water right transfer application. Don't hesitate to give our office a call should you or the agent processing these water right transfer applications have any comments or questions. Please copy our office on all correspondence dealing with these two water right transfer applications. Thanks for your time and have a great day.

Regards,

Zach Latham M.S., Hydrologist
