

MEMORANDUM

Date: August 26, 2009
To: File
From: Nick Van Dyke
Re: Application for Transfer 75824, Right No. 95-2164

This memorandum addresses a response I received by telephone to an August 20, 2009 letter I sent Jennifer Tinkey, representative of the applicant, City of Coeur d' Alene.

On August 26, 2009, I received a call from Jim Markley, superintendent of the City of Coeur d' Alene's Water Department. He stated he had been in contact with Jennifer Tinkey and had been asked to respond to the questions raised in my August 20th letter. In response to my questions, he stated:

- The City intends to use is the place of use boundary the Department has on file for Coeur d' Alene's municipal rights versus the place of use boundary outlined by the shapefile originally submitted with the application.
- The map enclosed with my August 20th letter correctly represents the City's diversion system.
- They do not intend to use the existing well for Right No. 95-2164, but rather pump that right from any of the City's 10 existing wells on there municipal system. The existing well for Right No. 95-2164 may be brought online at a later date, at which time they intend to file a transfer to add that point of diversion.
