Attachments: 75824_amended_app.pdf

Jennifer,

Attached is the amended application. To summarize the changes made:

- On Part 1.A., purpose of transfer, both Change nature of use and Change point of diversion are now checked. The change in nature of use is due to the irrigation to municipal conversion and because the current well for 95-2164 will be left off the system for the time being, a change in point of diversion is needed.
- On Part 1.B., the description of the right after the change now shows 95-2164 as municipal with a season of use of March 15 thru November 15 (standard for the area). You'll also notice I added a value of 948 ac-ft to the total authorized amount of water. This is calculated by the total acres under the right multiplied by the standard irrigation volume allowed for the area (316 acres * 3 ac-ft/acre = 948 ac-ft/annum).
- I've checked Part 3.B. because the transfer is now changing the nature of use for 95-2164.

I also included a map because the GIS shapefile submitted with the original application didn't quite match the City's other municipal rights. The map documents for the file the place of use request for 95-2164 exactly matches the City's other rights. The only other attachments that need to be re-submitted is the list of City wells w/o the Hawk's Nest Well and attachment #8a, as we discussed. Don't worry about including the minimum requirements checklist.

Let me know if you have any questions on this, thanks.

Nick

Hi Nick-

I spoke with Bob Haynes this morning about the decision to approve the transfer as a municipal use but that it will be limited to irrigation. I have attached a map showing that the City irrigates a minimum of 319 acres.

Let me know if you need anything else to complete the approval.

Thanks,
Jennifer

Jennifer,

Thank you for having the City prepare a map. Yes please hold onto the map for now. I learned yesterday of the situation you described below and now have direction to do some research into why the SRBA handled the Pocatello case differently. I'm hoping to schedule a meeting soon with Bob and other IDWR staff to discuss this issue and make sure there is consistency on how this type (irrigation into municipal system) of transfer application is handled. Look to hear from me soon. Thanks.

Nick

Subject: City of Cd'A transfer application # 75824

Nick,

I had the City water department prepare a map of the service area with 319 acres of irrigation shaded. Before submitting this to you, I spoke with Bob Haynes and he suggested that I wait. His concern is the possibility that transfers are being handled differently on the adjudication side vs. the administrative side. There is a case that was decided by the Court recently involving the City of Pocatello and irrigation/municipal rights and the service area. Bob just wants to make sure that there is conformity and this may affect the way our transfer is proposed.

Please let me know if you have any thoughts on this or need more information.

Sincerely,

Jennifer Tinkey
