Part 3B Attached for Each Split Right

Describe the reason for the proposed changes

This application proposes to dry up 1 acre of land in order to provide water for two existing ponds during the irrigation season. The ponds are adjacent to the land being dried up. The transfer dries up enough land to both fill the ponds and also to mitigate for any water losses in the ponds. The application also adds Mrs. Stone as a co-owner of the water right. Application 36-16828 covers water use in the ponds during the non-irrigation season. Recreation use is for waterfowl hunting.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

Water exiting the ponds runs into the Bell Ditch, eventually ending up in the Snake River.

B. Describe the effects on other water uses resulting from the proposed change

Less land will be irrigated so water can be used for different purposes on the same property.

5. Total Amounts Transferred

	Rate	Acre Limit	Total Acres	Volume
36-3E	0.20 cfs		5.0
