RE: Change in WR ownership and change in point of diversion

Blake and Dave:

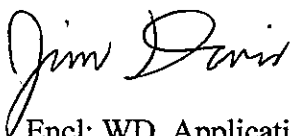

Enclosed is Notice of Change of WR ownership, fee for \$125 and warranty deed that is of record in Butte County. Per our 2/18/10 conversation in your office the water rights are currently listed under J-P Ranch. Let me know if there are any errors in this application.

I plan to apply for change of point of diversion on my visit to your office on 3/18/10 and have enclosed page 13 of old application for transfer showing the 5 water rights place of use, SPF's proposed new well and location of new point of diversion where I wish to drill new well. Please let me know by mail or email if SPF's place of use is correct according to your records and if my location for the new well is something that would work with your department. I hope to meet with a well driller on 3/17/10 to get his opinion on location of a new well so any insight from your office would be helpful with our decision as best place to apply for a new point of diversion.

I would like to start drilling new well in early September 2010 which I hope 5 to 6 months is a practical time line to acquire application approval from your office. If you have any questions concerning my proposed new well location please call me.

I appreciate your time in working with me on these applications.

Sincerely,

Encl: WD, Application, fee, maps
