Re: Application for Transfer No. 74307

Dear Applicant:

Barron Development LLC filed the above referenced application to change water right no. 63-32688. Information recently available to the Idaho Department of Water Resources (IDWR) suggests one of three options might be warranted at this time as summarized below.

1) Withdraw – The applicant might want to withdraw the application and seek a refund of the \$250 filing fee. Please use the enclosed form and include a written request for a refund if desired.

2) Proceed – Barron Development might want to proceed with the application. Additional information would be necessary under this alternative. Please provide the following information in order to proceed with the application.

Warranty Deed - The deed included with the application referenced "together with those certain water rights as mentioned in the option contract dated June 13, 2005, under paragraph #15." The contract was not included in the application. Please provide a copy of the contract to verify that Barron Development LLC has authority to change the water right.

3) Assign – The applicant could assign the application to another party by using the enclosed form. This would require similar evidence that the new party has authority to change the water right.

Please provide your written response within the next thirty (30) days. Without a timely reply, IDWR will issue a preliminary order to reject the application. The application fee will not be refunded for a rejected application. A rejected application may be re-filed when adequate information can be provided.

Sincerely,

Steve Lester
Water Rights Supervisor
