Re: Application for Extension of Time to Avoid Forfeiture, Water Right No. 77-4075

Dear Ms. Forrey:

The Idaho Department of Water Resources (IDWR) received the above referenced application and offers some suggestions in this regard. Please see the enclosed information.

The application should be amended. That can be done by making an appointment with me at this office or by completing an amended form and submitting it to this office. A copy of the original application shows the items that should be changed as follows.

- ✓ 1) Point of Diversion – The right was decreed with a point of diversion in the NWNWNW Section 8 instead of the SENW listed on the application.
- ✓ 2) Place of Use – The right was decreed with a place of use in the SWNE but not in the NWNE.

The application can be processed if properly amended.

✓ AMENDED e 3/19/10 office visit

If you think the right was decreed with incomplete and/or incorrect information regarding the location of the point of diversion and/or the place of use, you should also file an Application for Transfer to correct or otherwise change the right. Information about filing a transfer can found on the IDWR website. Select the "water right transfer" icon on the top center of the homepage to learn more about transfers. Also, please feel free to contact me for more direct help with transfers if you prefer.

Please provide your written response or make an appointment to handle this within the next thirty (30) days. Applications are typically voided without a refund of the filing fee if a timely reply is not made. Thank you for your attention to this matter.

Sincerely,

Steve Lester
Water Rights Supervisor
