Aaron – Here are the rights as decreed: 36-2297 1.82 cfs 91 ac/year 364 afa

36-7377F	0.24 cfs	15.5 ac/year	62 afa
36-7547F	<u>0.35 cfs</u>	<u>32 ac/year</u>	<u>128 afa</u>
	0.49 cfs	32 ac/year	128 afa

Totals	2.31 cfs	123 ac/year	492 afa
--------	----------	-------------	---------

Based on our discussion this pm, 6 acres would be removed from 36-7547F due to forfeiture, leaving the other 2 rights unaffected. 36-7547F should be reduced to 0.25 cfs to get rid of excess rate that never actually existed, 12.5 ac/year so flow rate does not need to be reduced (or 10.5 ac/year & reduce flow rate to 0.21 cfs), and 42 afa for 10.5 new acres under this right. That is my best guess, anyway, but Shelley may see it differently. Since the file is open, it seems reasonable to reduce the silly overlaps as much as possible. Back to you. Once I get the final numbers from you, I will get the extensions of time into advertising.
