To: Idaho Department of Water Resources and Telford Lands LLC

Gentlemen,

It is with the recognition of the many demands on your time and attention as well as the belief that you desire to maintain the perception of credibility that this letter is respectfully written in protest to Application #76286 for a new point of diversion.

Upon review of the application several negative impacts became apparent that you may desire to be aware, of which three are addressed here. The first would regard the difficulties and challenges of administration by the Water District. The second would relate to the current methods and practices of accounting as to maintaining the Public's trust and perception of credibility in the Department and the Applicant as well as the Water District. And third would be the exposure to abuses by others less honorable than the applicant.

As an old saying goes, "a picture is worth a thousand words", perhaps it would be best to discuss these concerns openly and in person that we may enhance positive and productive communication and understanding.

Respectfully,

Kirby A. Jensen Phone: 208-589-5472
