Jach,

In researching this transfer I noted that there was an approved transfer (T-5282) associated with the property. This transfer created a 591 acre ppu with all rights combined limited to 584 acres. When looking at the 2004 aerial photo it appears that the irrigated ppu probably exceeds 600 acres. You can find the transfer in the back file for 36-2101. There are currently 6 rights associated with the PPU.

The combined right language paints a considerably different picture of 584 ac limit within a 591 PPU. Everything considered probably the PPU should be increased by the 16.1 acres and all rights be included. When discussing the fees with Allen, it did not appear that additional fees would be due. Options would be to withdraw the transfer fix it and then resubmit it or possibly do a corrected application.

I will finish data entering it as well as the others and then see what happens. You might have to get Honsinger added as an applicant. We will just have to see what reality is. I saw a licensed right associated with the same property that was in Grant's name so ownership really needs to be cleaned up. In looking at the 2004 and 2007 aerial photos it looks like they might have exceeded the acre limit for irrigation but that is just a side issue.

Kelly-

Right, I think Duane leases the land from Honsinger, I am working on getting an agreement between the two that will allow the 16.1 acres to be transferred into the 591 acre PPU. Thanks, and I'll let you know when I get the agreement. Knowing this, can you continue processing?

I started data entering this transfer which moves 16.1 acres of 36-7267 from the horseshoe pou to ground in 7S, 26E, S 31; 8S, 25E, S 1; and 8S, 26E, S 6.

The tax lot information and associated rights show the property in the name of Roy Honsinger. Has Grant purchased this property? If so, then we need documentation to support the change of ownership. If not ----?
