Re: Applications to Rent Water – Telephone Conversation Memorandum

Application for permit no. 63-31184 for industrial use is currently being reviewed by the department for industrial uses using water from a pond. Water right license 63-12072 currently authorizes wildlife, recreation and aesthetic storage from the pond. Attorney Deborah Nelson filed two applications to rent water from the water supply bank on behalf of Unaga-Eusti Enterprises, Inc. DBA G & B Redi-Mix (applicant) to accommodate water use by the company while the application for permit is under review.

The applicant requested rental of 110 acre-feet for temporary mitigation for evaporative losses from the pond and 20 acre-feet of water for commercial and industrial use. In a telephone conversation with Deborah Nelson, I requested additional information to verify the amount of water required to satisfy the applicant's water uses including the volume of the pond, whether they intend to increase the size of the pond, and whether water for dust abatement was included in the volume requested.

Today I spoke with John Marshall, also representing the applicant, to discuss the status of the applications and additional information required. The applicant's attorneys are actively working with the department on the application for permit and coordinating additional information required through Shelley Keen. It was decided that processing of the applications for rent should be held pending the outcome of the application for permit.
