Re: Water Right 65-23279 Clarification

Dear Mr. Walker:

The Department is currently processing application for water right transfer no. 75730 proposing to split right 65-23278, add a point of diversion, and create a permissible place of use for the right. For ease of administration of water right 65-23278, your water right 65-23279, was revised to clarify the number of acres authorized for irrigation. Previously, rights 65-23278 and 65-23279 were conditioned in combination authorizing a total diversion of 0.39 cfs for irrigation of 30.2 acres. Right 65-23279 has been modified to indicate diversion of 0.29 cfs for irrigation of 22.1 acres within a 34.7 acre place of use is authorized. This change is a clarification the water right appurtenant to your property for ease of administration of the right. It is in no way a reduction in authorized use of the right. I have enclosed a highlighted copy of the current water right report for your right illustrating the condition of approval that was updated. Please feel free to contact me at (208)334-2190 should you have any questions.

Sincerely,

Angela M. Grimm
Water Resource Agent, Sr.
