Re: Bashaw transfers – Picabo Ranch
Project No. 010-01-1999

Dear Jim:

I spoke with Mr. Bashaw this morning relative to the latest iteration of the permissible place of use map (ca. June 8, 2000). We reviewed the entire map and he indicated several minor changes that need to be made:

1. The northeast corner of pivot 4 in the NW1/4 NE1/4 Section 17 will likely be irrigated with hand lines, so the PPU line needs to be extended here.
2. In the NE1/4 SE1/4 Section 18, Mr. Bashaw is in the process of blasting rock from the slope of the crater, and will cover this area with topsoil. The pivot here will then make a 360-degree arc rather than stopping at the edge of the crater.
3. The PPU line should extend slightly farther up the cove just west of Point of Rocks.
4. The northernmost area (in Section 8) is accurate, although the west boundary of this area needs to be moved westward to coincide with Mr. Bashaw's fence line, which is approximately 25 feet west of the north-south road.

I anticipate meeting with you briefly to clarify these issues once you return and have had a chance to review this.

Sincerely,

Charles G. Brockway, P.E.
