Subject: RE: Russell Subdivision

Great question Vicky. I called the applicants and talked to Clara Mae Brinkerhoff, Secretary for Russell Subdivision, who confirmed that two wells are located in the same lot, next to each other, but only the larger, primary well is used. The other well is a smaller, back-up well that would only be used if the primary well was down for repairs. The well agreement references one well because both wells don't operate at the same time. Please let me know if you have any other questions or need additional information. Thanks Vicky.

Subject: Russell Subdivision

Hi Lori –

I am processing both transfers for the Russell Subdivision, 75809 and 75810. In the application for 75810, Attachment B – the map, shows 2 wells in the same lot in the north part of the subdivision and the transfer itself references 2 wells, 65-1663 as a backup to 65-9066. However, Attachment D, the well agreement only references 1 well. Are there 1 or 2 wells that are operational on the same lot in the north ?

Thank you and have a great weekend.
