RE: Application for Transfer

Dear Applicant(s):

The Department of Water Resources has received your application for transfer. Preliminary review of the application indicates that it is incomplete and cannot be accepted for processing. We are returning your application to allow you to complete the necessary items. The required information is described below.

The Place of Use/Acres Irrigated being transferred was not provided correctly. The acres identified in section 35 does not equal the acre total of 260.3 (Item 4. Place of use).

Under item 5c of the transfer application, you indicated that water right 73-171 from Big Creek will be used as a supplemental source of supply when available. Please provide an explanation on how water right 73-171 is delivered. Will this water right be delivered through the pivot irrigation system? Will this right be used to flood irrigate the land in the SESW and SWSE of 14N, 23E, Sec. 34? If water right 73-171 is delivered through the pivot irrigation system, then it needs to be part of the transfer.

The map of proposed place of use for the 4 pivots which you provided was digitized and then overlaid on a 2009 aerial photo. It appears that the proposed place of use does not cover all land being irrigated (see attached map). What will happen to this irrigated land?

It has also come to our attention that after the proposed place of use change to water rights 73-214, 73-216, 73-4092, 73-10086 and 73-12044 there will be a 1.3 acre overlap with water right 73-2152 (see attached map).

Please feel free to contact this office if you have any questions.

Sincerely,

Blake Jordan
Sr. Water Resource Agent
