SUBJECT: Possible Future Illegal Irrigation

Allen – I got a call today from Dennis at Eastern. He reported seeing land being cleared along the south side of Lake Walcott where Little Warm Creek runs under the highway and into the Snake River. He gave me a legal description, so I checked it out and found out that this is the Osborn property. There are 2 pivots in a wide area along the highway, and then some handlines east of there where the farming area gets narrower. The 2009 ArcMap photo seems to agree with their water rights, so the current usage appears to be ok. But they could be illegal next year if they take in additional land. They have several decrees and one license – no permits that could allow additional development. I told Dennis I would pass this on to you for consideration.
