

MEMO

TO: File No. 57-11673
FROM: Sandy Hemenway
DATE: March 3, 2010

I spoke with Mr. Brimson today, and he stated that he approved the Application for Amendment (for licensing purposes) that he signed, having a Maximum Diversion Volume of 20.0 AF. He stated that it was not a big deal to him, and he did not want another Application for Amendment (for licensing purposes) mailed to him to sign and return.

This memo addresses whether the stockwater + domestic volumes should be additive to the irrigation volume or not.
