Subject: Permit # 84-12191

Emalee,

Sorry to pick on you with this e-mail. Perhaps you can steer it in the correct direction.

I received a letter from IDWR demanding additional fees for "*Well Construction Rules of the Department*". If these funds are for "well construction" then why were they not assessed at the beginning of the project? I believe this process is becoming a "black hole" for my money. Is there an annual tax associated with this permit?

First, I can't recall reading about this erroneous fee. I don't recall see it in the "Fee Schedule" or reading about it in the application pamphlet. I would like to know where this information is embedded in your literature. Is it policy to disclose this information after the process has begun?

Second, in my conversations with this department, no one has made this fee known. I have spoken with both Boise and Coeur d'Alene offices and again, no one has made this fee known.

I believe you have lured us into this position, allowing us to spend nearly two hundred dollars before announcing this fee! How much of my money can be returned to us?

I eagerly await your reply.

Thanks- Jim Bolin
