RE: Application for Transfer for Telford Lands, LLC.

Dear Dave:

Enclosed for processing is an Amended Application for Transfer of various water rights owned by Telford Lands, LLC. The purpose of the transfer is to add a point of diversion to the listed water rights. Mr. Telford currently shares a well with another individual in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of T5N., R26E., Section 29, and there have recently been some concerns raised relative to its management and maintenance that impacts Telford's ability to divert its full water right. If the transfer for the new proposed point of diversion is approved, it is possible that the existing point of diversion at the shared well location will be abandoned by Telford Lands, LLC. However, at this point, the application retains the disputed well location, and seeks to add a new point of diversion located approximately 1/4 mile to the east. The maximum amount of water we proposed to be diverted from the new well location is 5 cfs. The enclosed filing fee is based on this amount. No other proposals are proposed with this transfer. We therefore only enclosed a new map that shows the proposed new point of diversion under these water rights in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of T5N., R26E., Section 29.

If you have any questions or concerns, please let me know. Regarding the ESPA Transfer Tool, we met last Friday, and due to the multiple points of diversion under these water rights, we requested your assistance with running the tool. It is my understanding that you ran the model based on an acceptable node, and did not find any adverse impacts. We have therefore not submitted an ESPA Transfer Tool analysis as you have already ran it. The proposed point of diversion location is very close to the existing point of diversion location, and we would not anticipate any adverse impacts from the transfer. Thank you for your assistance on this matter.

Best Regards,

Robert L. Harris

RE: Application for Transfer for Telford Lands, LLC.

Dear Dave:

Enclosed for processing is an Application for Transfer of various water rights owned by Telford Lands, LLC. The purpose of the transfer is to add a point of diversion to the listed water rights. Mr. Telford currently shares a well with another individual in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of T5N., R26E., Section 29, and there have recently been some concerns raised relative to its management and maintenance that impacts Telford's ability to divert its full water right. If the transfer for the new proposed point of diversion is approved, it is possible that the existing point of diversion at the shared well location will be abandoned by Telford Lands, LLC.

The maximum amount of water we proposed to be diverted from the new well location is 8 cfs. The enclosed filing fee is based on this amount. No other proposals are proposed with this transfer. We therefore only enclosed a new map that shows the proposed new point of diversion under these water rights in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of T5N., R26E., Section 29.

If you have any questions or concerns, please let me know. Regarding the ESPA Transfer Tool, this location is located outside of the active nodes within the transfer tool. Additionally, however, the proposed point of diversion location is very close to the existing point of diversion location, and we would not anticipate any adverse impacts from the transfer.

Best Regards,

Robert L. Harris
