RE: Water Right Transfer Application – Salmon Falls Land & Livestock Co Inc.

Dear Monica,

Enclosed is a water right transfer application for surface water rights 2-7249 and 2-7462 in the name of Salmon Falls Land & Livestock Co Inc. The purpose of the enclosed water right transfer is to create a 2800.6 acre permissible place of use so that Salmon Falls Land & Livestock Co Inc may irrigate efficiently on their property, and to resolve pending SRBA objections to Salmon Falls Land & Livestock Co Inc's water rights by the U.S. Department of the Interior (BLM). Currently, all irrigation appurtenances within the proposed PPU are tied together by buried mainlines. The total number of irrigated acres as recommended by IDWR is not proposed to be changed pursuant to transfer approval.

A February 19th 2009 SRBA initial status conference meeting was held in Boise Idaho on the above reference water rights, at which you and I were in attendance. The special master presiding over these water right subcases in the SRBA agreed that submission and final approval of the attached water right transfer application (newly proposed PPU does not include any federal lands) by IDWR should allow for SF-5 amended recommendations to be drafted, which would alleviate concerns outlined in objections filed by the BLM and Forest Service to Salmon Falls Land & Livestock Co Inc's water right recommendations. We ask that processing of this water right transfer application be expedited because resolution of objections in the SRBA to Salmon Falls Land and Livestock Co Inc's water rights is pending on IDWR's approval of this water right transfer application.

Please copy our office on all correspondence regarding this water right transfer application. Also enclosed is a check from Brockway Engineering for the amount of \$1207.80 U.S. dollars. Thank you for your assistance on this matter and if you have any questions or comments, please don't hesitate to give me a call.
