Re: Application for Permit No. 63-33294

Dear Applicants:

You filed the above referenced application a couple months ago for an existing well to irrigate 27 acres. The Idaho Department of Water Resources (IDWR) can process your application when a few items are clarified. Please see the enclosed amended application for your review.

- 1) Item 3 - The proposed site is in the NWNW Section 7. Your original application listed the well in SENW.
- 2) Item 7 - The amount of time to complete the proposed project was not identified in the original application. Acceptable answers are 1, 2, 3, 4 or 5 years in which to put the water to the proposed beneficial use.
- 3) Item 10 - The original application identified Wilder Irrigation District for Section 6. List any existing irrigation water for the 27 acres in Section 7. Enter "none" if you do not have irrigation water for those acres.
- 4) Item 12 - A well driller report for the 1972 well cannot be found in IDWR records. Use your best estimate to complete the sentence shown in this item (approximate depths from which this well produces water).
- 5) Signatures - Both signatures are needed on the amended application.

Please make any other changes that you think are needed. Return the completed application to me at you earliest convenience. Applications are typically voided if a written reply is not received within thirty (30) days. More IDWR information is available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you have any questions. Thank you for your help with this.

Sincerely,

Steve Lester
Water Rights Supervisor
