Amended application for permit proposes impounding up to 72.8 acre feet of water per annum from an unnamed stream in three existing ponds for wildlife storage purposes. The application also proposes to divert up to 1.35 cfs of water from the unnamed stream at the upper and lower of the three ponds for irrigation of 81.2 acres. The ponds and irrigated acres are located approximately 2.4 - 3.25 miles south and 0.25 - 1.5 miles east of the Highway 75 and Highway 93 intersection south of Challis. This amended application proposes the diversion and use of water tributary to a federally designated Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The wildlife storage proposed in this amended application will benefit from the subordination provision because it is for storage purposes and the irrigation diversion rate and acres will be applied to the subordination amounts specified in the decree for the Salmon Wild & Scenic River.

***Permits will be subject to all prior water rights.
