The purpose of the transfer is to change the nature of use for a portion of the right, previously used for irrigation of 1.7 acres, to diversion to storage and aesthetic storage uses for mitigation of the consumptive losses associated with a pond in City of Boise's Optimist Park located on the south side of Hill Rd and east of Horseshoe Bend Rd just over 2 miles east of Eagle. The unchanged portion of the right will remain within the current service area of the Boise Valley Irrigation Ditch Co, largest portion of which is generally located northeast of the Boise River from one mile east of Eagle south/southeast approximately six miles along Hwy 44 (State Street).

The purpose of the transfer is to identify one replacement well, describe all ten wells which serve the integrated city system under each right, and accurately reflect the city's current service area.

Permits will be subject to all prior water rights. Protests against permit applications may be submitted based on the criteria of Idaho Code § 42-203A. For specific details regarding the application, please contact the Idaho Department of Water Resources (IDWR) Western Region at 208-334-2190 or visit www.idwr.idaho.gov with detail provided under "new water right applications." Steve,

I have attached the
driller report for the domestic
well at our house.

The irrigation well site is
about 400' away from the house
well. I realize the strata
might be different but if it
is the same it looks like
screening 80-115 ft would work.

If the strata is different would
we have the opportunity to vary
the screen placement?

Thank you

Ker Aschburner
