Describe the reason for the proposed changes

Transfer describes the place of use as it currently exists, which is different than what is recorded for the water rights involved. Canal water is also used on this property, allowing groundwater use to stay within allowed limits. The location of the west well is described incorrectly on the water rights, so is being corrected based on GPS data for that site.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
