RE: Application for Transfer 69327 (Water Right No. 63-9276)

Dear Mr. Lester,

This letter is in response to your correspondence of January 5, 2010, regarding the processing of the above-referenced Application for Transfer.

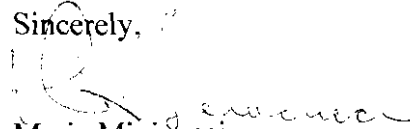

Our staff estimates potential supplement use of the well to be approximately 40 acre-feet per year. At current rates, the cost of an equivalent number of BCCC shares is \$3,400. These shares would not be theoretically available in short water years, making even theoretical mitigation impossible.

The Department would like to propose the following mitigation plan for the use of supplemental ground water at the Warm Springs Golf Course:

- In years when the Department anticipates that it will use supplemental ground water at the golf course, it will submit an application to the Water District 63 Rental Pool. The application will be for the maximum anticipated use of ground water in the irrigation season.
- The Department will meter all ground water diverted specifically for the golf course.
- At the end of the irrigation season, the Department will provide IDWR with an accounting of all ground water diversions and concurrent use of the Rental Pool.

Please contact this office if you require any additional information.

Sincerely,

Maria Minicucci

Property Administrator
