

MEMORANDUM

File: Application for Permit #63-12154-- Sleger

Date: 01/14/10

From: J. Westra *JW*

RE: Application Processing-- #63-12154

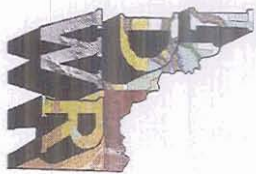

This application was filed during the Boise Basin hold in 1994. With processing commencing in 2008, the applicant was given the option of going to a > 200 ft. water bearing zone or mitigation—within Boise River Shallow GW Boundary.

Mr. Sleger's existing well is 87 ft depth, and he did not want to deepen his well or drill a new well for 1.3 acres of irrigation. He chose to submit a mitigation plan. Over the past year +, he has been unsuccessful in obtaining surface water shares or a portion of a GW right for mitigation.

On 01/06/10, a preliminary void order was issued from this office. On 01/13/10, Mr. Sleger contacted this office. We discussed the matter. Mr. Sleger stated that he had gone to drip system for trees/shrubs and planted low water use turf. With the changes, he was probably close or a little over ½ acre of irrigation. I discussed that his house, driveway, and non-irrigated footprints should be subtracted. Given the circumstances, Mr. Sleger felt that a domestic use water right (1/2 acre irrigation) would be acceptable. He amended the application by omitting the irrigation use. We could proceed with processing the application.

The legal decription listed on the original application, well log, and public notice of SE of NW is incorrect. We did not have the GIS and taxlot technology in 1994. The legal should read NE of SW. This is a domestic right and correction of the legal decription is not fatal. No need for re-advertisement.

Withdraw the Void.
