

RECEIVED**DEC 17 2009****DEPARTMENT OF
WATER RESOURCES**

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Amended

1. Name of applicant(s) ID Dept of Lands, Payette Lakes Area Phone (208) 634-7125
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address: 555 Deinhard Lane City McCall
 State ID Zip 83638 Email: skeafer@idl.idaho.gov
2. Source of water supply Paddy Creek which is a tributary of Rapid Creek
3. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
17N	4E	28		SW	NE	NE	Valley	Paddy Creek	

4. Water will be used for the following purposes:

Amount 0.78 cfs for Commercial purposes from 5/15 to 12/15 (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 0.78 cubic feet per second (cfs) and/or (b) 2 acre-feet per year (af).

6. Proposed diverting works:

- a. Describe type and size of devices used to divert water from the source. Temporarily placed volume pump to fill a water tender
- b. Height of storage dam NA feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12.
- c. Proposed well diameter is NA inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? NO
- e. If well is already drilled, when? NA; drilling firm _____;
 Well was drilled for (well owner) _____; Drilling Permit No. _____

7. Time required for completion of works and application of water to proposed beneficial use is NA years (minimum 1 year).

8. Description of proposed uses (if irrigation only, go to item 9):

- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; show name of municipality or the applicant's qualifications as a municipal provider. _____

- d. Domestic; show number of households. _____

- e. Other; describe fully. SEE ATTACHED

RECEIVED**DEC 23 2009**

WATER RESOURCES

ATTACHMENT FOR QUESTION NUMBERS 8e & 12
STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

Question #8e

Description of proposed uses:

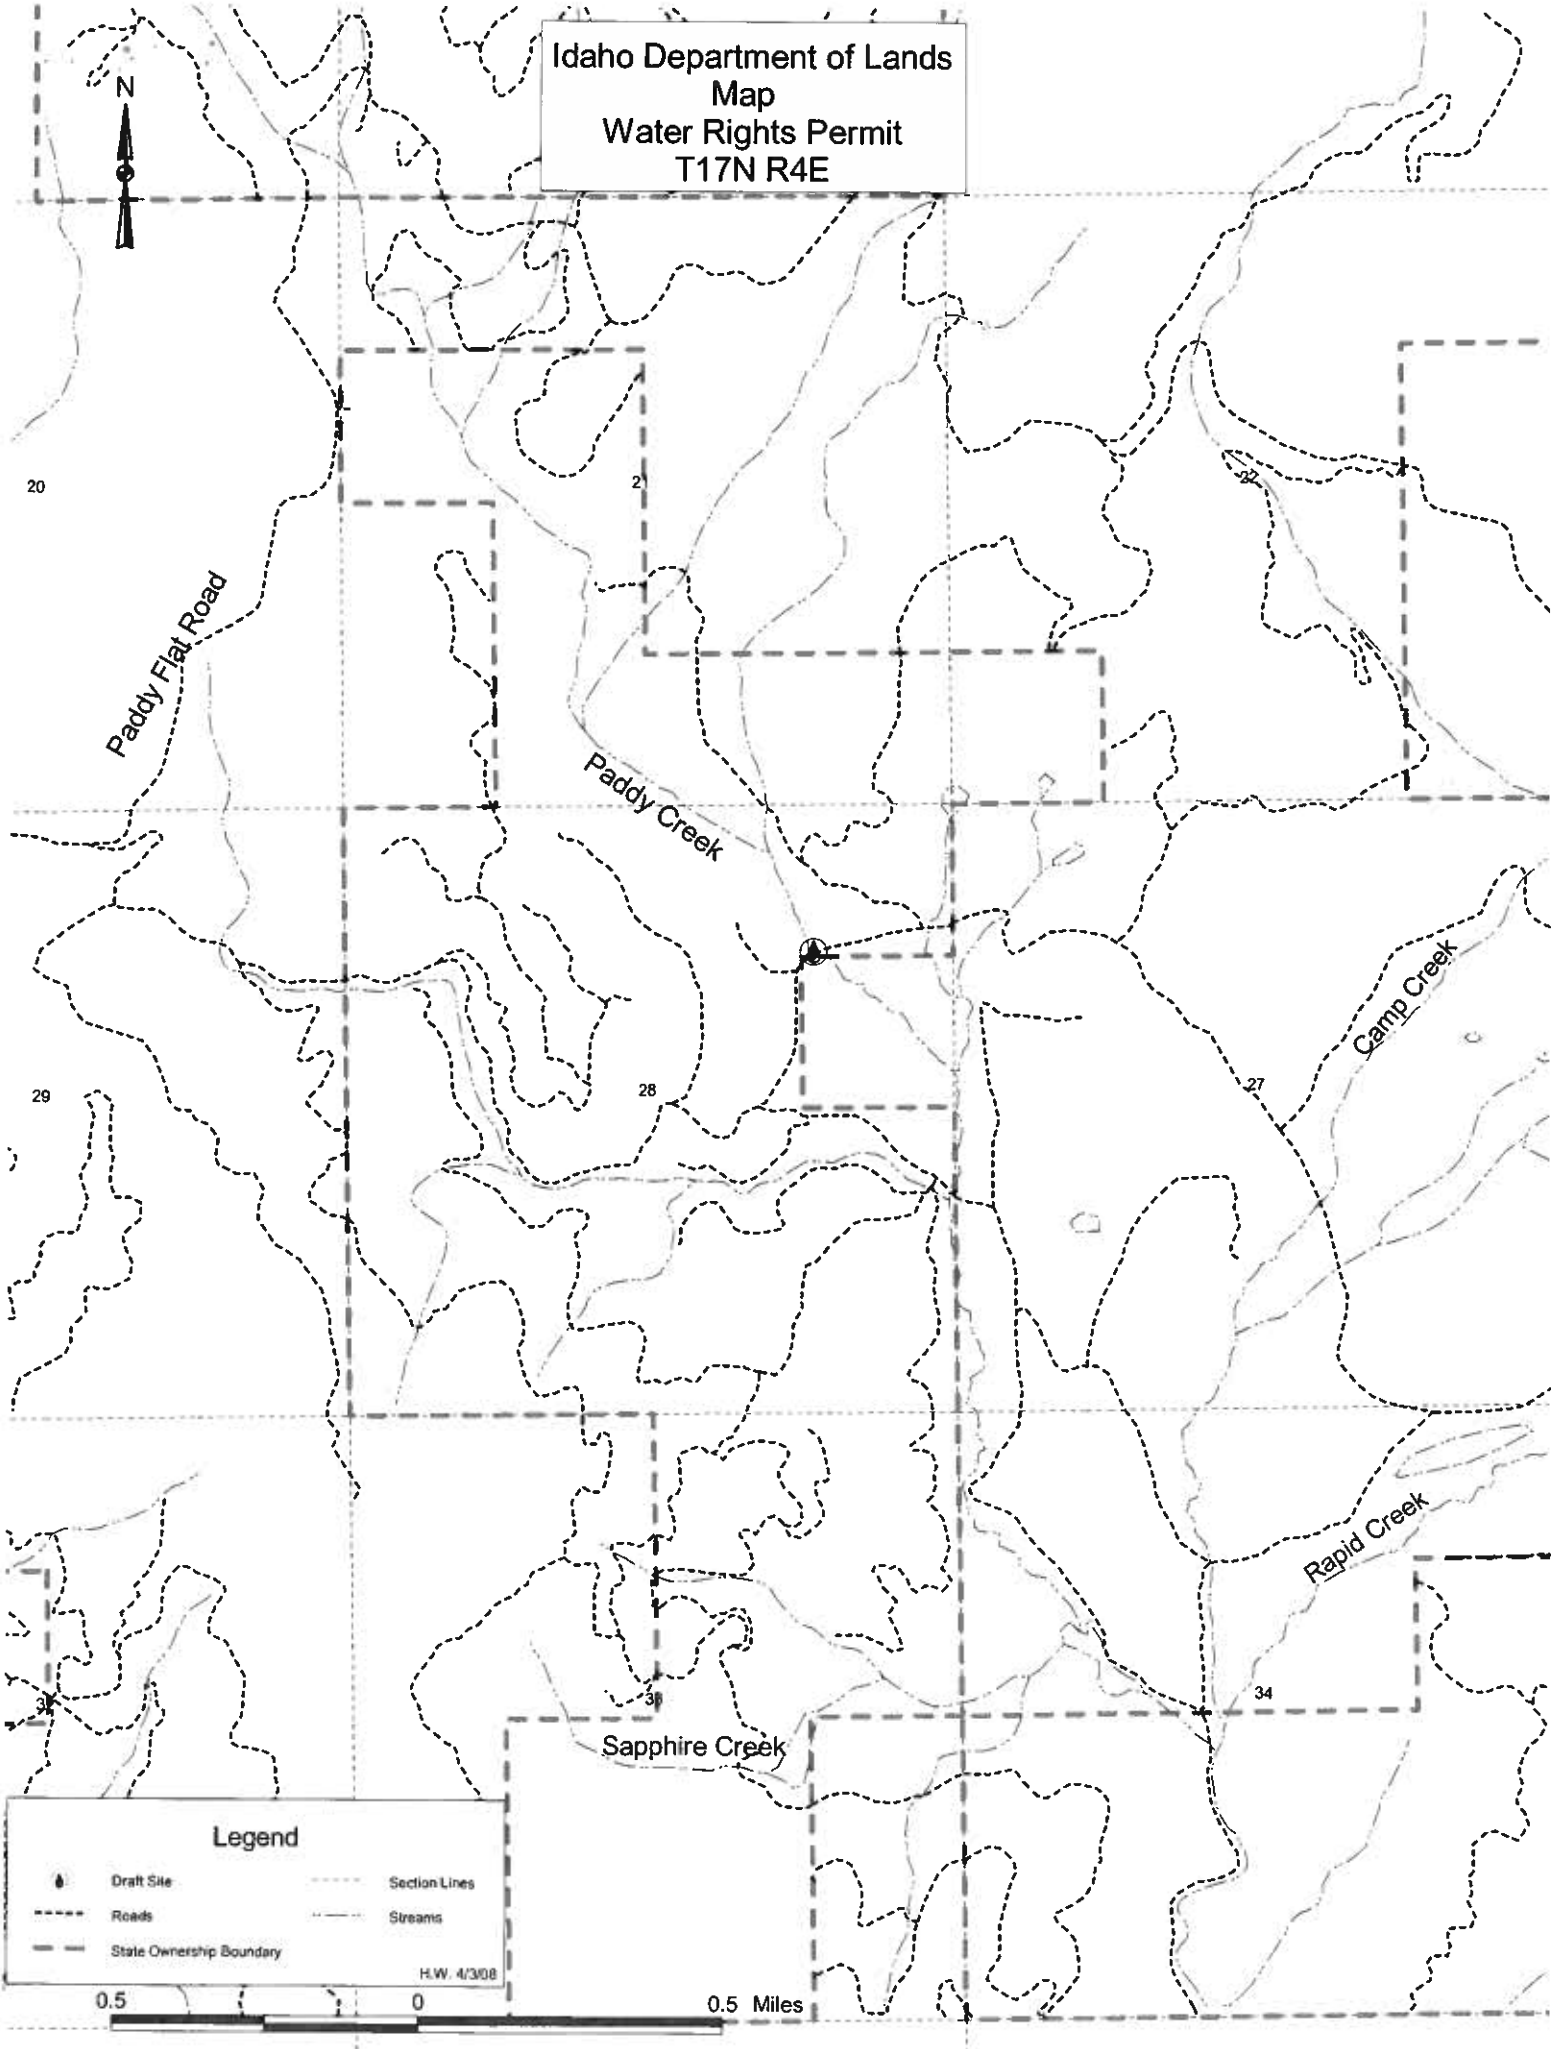

Resource extraction and management of endowment land requires the use of water for dust abatement, construction, and surfacing of system roads to maintain air quality and water quality. Dust abatement, using water from a local source, extends the life of gravel and native surfaced roads, reducing costs to maintain the beneficial uses.

Question #12

Describe your proposal in narrative form, and provide additional explanation for any of the items above.

This application is being submitted to obtain a permanent water right at the indicated location. This water right will be used to water roads and abate dust during road construction activities, hauling logs and other transportation needs for roads located on State Endowment Land and State owned easements. Water use will not be consistent throughout the indicated period of time each year. This type of use usually requires water to be extracted for a 10-20 minute time frame approximately 2-3 times a day. This usage may last for 1-2 months at a time and this usage period may not occur for another 1-4 years depending on the local road development, maintenance and logging activity on State endowment land.

RE: Application for Permit: 65-23375 and 65-23376

Dear Watermaster:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Buffington

Subject: RE: Applications for Permit 65-23376 and 65-23375

Kay,

After discussion with some of the Area's foresters, we have decided to request the 5 year period. It appears that you understand the nature of our "works", i.e. that they periodic and temporary in nature. We may in fact complete the "works" before that time but do not have anything planned as yet. When we use each site for the first time we will document the use, with dates and pictures, and forward to DWR to establish beneficial use. If this e-mail is not sufficient "written confirmation", let me know. Thank you.

To: Sheldon Keafer
Cc: Walker, Kay
Subject: Applications for Permit 65-23376 and 65-23375

Mr. Keafer:

We have data entered the applications for permit that you submitted for Wagon Bay Creek (65-23376) and Paddy Creek (65-23375). However, on the application forms under item 7 you did not specify the number of years required for completion of works. The form states you may request a minimum of 1 year, and the application instructions describe a maximum of 5 years can be requested. You have inserted "n/a" on that line of the form and we must have something to enter in our data base. Please send me some written confirmation that you are agreeable with 1 year for development. I realize that you won't need that much time to install a pump and start filling the water tender but we must have some indication of time needed.

Thank you for your attention to this matter.

Sincerely,

KAY WALKER

RE: Applications for Water Right Permits

Dear Mr. Keafer:

We are in receipt of two applications for water right permits that you submitted in April of 2008. We are now in the process of reviewing these applications and find we need additional information and/or clarification regarding these proposals. Enclosed for your convenience, are copies of the applications as they were submitted.

In July of 2008, Section 42-201(3)(b), Idaho Code, went into effect and may cause you to re-evaluate the filing of these applications. This section of Idaho Code appears to allow water from a natural watercourse to be used for forest practices, as defined in 38-1303(1), with or without a water right. Enclosed, for your convenience, is a copy of this statute that you may want to examine to see if you are still in need of the proposed water right applications. If you do intend to pursue these applications, we have some suggestions as to their completion.

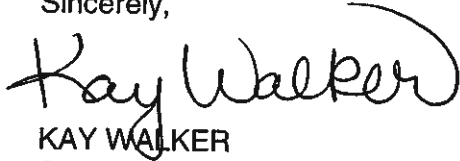

Both applications identify an amount of 2.0 acre feet of water to be used for commercial purposes. The applications further describe a diversion of up to 350 gallons per minute to fill a water tender. If a diversion of 350 gallons per minute is intended, that would equate to an amount of 0.78 cfs. The filing fee for 0.78 cfs is \$250.00 rather than the \$100.00 submitted with each application form. The filing fee should be based on what is actually going to be diverted rather than a volume amount. If you wish to reduce the amount of water to 0.20 cfs (90 gallons per minute) the filing fee submitted would be sufficient.

The application form, for multiple sources of water, does not appear to be a typical application. Normally, an application for water right is submitted for a single water system proposal. How can the multiple sources and multiple points of diversion under this application be quantified as a single water system? It appears that a separate application would be needed for each proposed water diversion unless you can provide information that shows it is just one system.

Please review the applications and address the items identified above if you wish to pursue these filings. If you decide that the applications are not necessary, you may withdraw them and request a refund of the fees submitted.

If you have any questions in regard to this matter, please do not hesitate to contact this office.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is fluid and cursive, with a large loop at the end of the word "Walker".
