Subject: Water Right Transfer of 13+ acres from Rick Jolley to Western Mortgage and Realty

From: Steven D Young – Manager
Pasco Farming Inc. - Idaho Operations (Western Mortgage and Realty)

Dear Allen,

Western Mortgage and Realty purchased 13.7 acres of ground from Rick Jolley in the fall of 2008. The water rights that are on that ground that are not part of the A&B Irrigation district are to be transferred from Rick Jolley to Western Mortgage. Idaho Department of Water Resources needs to understand that the ground that we purchased was watered from Rick Jolley's private well that is immediately adjacent from the North East corner of the said ground and was not irrigated from the A&B Irrigation projects water diversion points or anything to do with A&B and it has been that way for as long as I have been involved in operating the adjacent ground of which I use to be the owner of and had been for the previous ten years. Also Rick Jolley has personally assured me that for as many years as he can remember prior to myself being involved here that this ground was irrigated from the said private well and not from A&B Irrigation District water.

Sincerely,

Steven D Young
Manager
