Subject: South County Estates Transfer

Michael-

I have gone back through my notes to figure out what needed changed with the application. Barring anything else coming up, the following items need to be corrected:

1 - The application indicates transfer of water right 37-2630 (O as in ostrich). It should actually be indicated as 37-2630 (zero). All references to this water right in the application need to be changed.

2 - The application indicates a recharge site in 02N 18E Sec 4 - NENW, which was not previously indicated on the map. In correspondence with Courtney Peppler (AMEC), she indicated this was a previously proposed site and should not be included on the application. All references to this recharge site need to be removed from the application.

Also, I need some kind of document giving you limited power of attorney to make the changes to the application on behalf of the applicants. Otherwise the applicants will need to sign something agreeing to the changes.

Since I have an idea of what is going on, not having the corrections immediately will not inhibit me from continuing data entry of the transfer, but I will not be able to send it on to Boise for further processing until I have them in hand. Thank you.
