

MEMORANDUM

Date: December 28, 2009
To: Application for Permit 72-16804 - Boren File
From: Jeanie Robertson
Re: Evaluation of Sufficiency of Information Submitted - Revised

This application is for 0.11 cfs to be pumped from the Salmon River for the same property as covered by right 72-2073D which diverts 0.07 cfs from Gardner Creek for the irrigation of 2 acres within a 3.8 acre PPU. This Salmon River water will be supplemental to the 2 acres under 72-2073D and primary for the additional 1.8 acres. (Transfer 76015 was recently filed on 72-2073D to correct the legal description and put the 2 acres into the 3.8 acre PPU.) According to Shelley's memo dated June 10, 2009, although this diversion is upstream from the East Fork of the Salmon, it is pumping less than 2.01 cfs, so we don't need comments from the Fish & Game and DEQ. It will, however, count against the block of water so I have entered it on the spreadsheet. For the Conditions, I followed the flow chart for **Measuring Device, Lockable Controlling Works, and Water District Conditions** on Wenet. Location of the place of use is a lot along the Salmon River near the convergence with Gardner Creek on the south side of HWY 75 approximately 14 miles west of Clayton, about ¾ mile west of Torrey's.
