Re: Application for Transfer Involving the City of Idaho Falls.

Dear Dave:

This letter is being provided at your request to provide additional maps from the City of Idaho Falls indicating locations of its current points of diversion in relation to the proposed points of diversion. Enclosed are two copies of three maps showing the location of the proposed well in relation to the City's existing wells that are the subject of the water right that is to have a point of diversion added. In addition, we have included a map which shows the location of all of the City's wells. If you have any questions or concerns, please let me know.

In addition, you requested that upon review of the location of the wells, to perform a transfer tool analysis to determine whether or not any effects that would be such that mitigation would be required. We have reviewed the information contained on the maps, and from the transfer tool, and have concluded that any effect from the additional point of diversion would be negligible. It therefore appears that mitigation is not necessary. If you have any questions, please let me know.

Best Regards,

Robert L. Harris

MEMORANDUM

To: Rob Harris, Holden Kidwell Hahn & Crapo

From: David Richards, Water Department Superintendent

Date: June 9, 2008

RE: **Water Right Transfer Exhibits**

Please find transmitted herewith five (5) copies each of three (3) maps labeled "Exhibit A," "Exhibit B," and "Exhibit C" per your request. The maps are intended to be supplemental information for the City's current water right transfer for an additional point-of-diversion on water right 25-2142.

"Exhibit A" indicates the location of the proposed well with associated quarter section lines overlaying an aerial photo of the area. "Exhibit B" includes the location of the proposed well along with the other wells associated with water right 25-2142 included in the transfer application. This exhibit also includes an overlay of the city's aerial photo but the quarter section lines have been removed as they become too burdensome to view at this scale. "Exhibit C" includes the location of the proposed well along with all other wells in the City. The aerial photo was replaced with a depiction of the city limits to keep the size of the digital file from becoming too big to print.

I hope these maps are sufficient for your needs. If adjustments need to be made, feel free to contact me. Thanks.

David Richards
Water Superintendent, City of Idaho Falls
