RE: App For Transfer 70893

Dear Bob;

In October, you were sent a letter requesting written comments from the Fish & Game Dept. and the Dept. of Environmental Quality on your proposed transfer to use Cedar Draw water in new recreational fish ponds. Comments were to be received by November 5. But no comments have been received, and you have not requested additional time to meet this requirement. If neither comments or a written request for more time (with an explanation of why more time is needed) by December 14, IDWR will issue an order rejecting your application. You will not be allowed to build the new ponds. Allen would like to approve your application while making the new use subordinate to upstream power rights and FERC minimum-flow requirements, but this will not happen without your cooperation.

Regards,

James E. Stanton
Sr. Water Resource Agent
