Re: Application for Permit 65-23327

Dear Lori:

The above referenced application for permit is being processed. Upon review of the application, there are a few areas that need correction or completion. The areas of the application that need correction or completion are as follows:

- The tributary (item no. 2). It appears Robbs Creek would be the nearest named surface water source a spring in the proposed location would be tributary. If this is correct, please amend the application accordingly.
- The point of diversion (PD) description (item no. 3) does not match the map provided with the application. The map indicates the PD will be in the SW NE SW Sec 8, T06N, R02E, rather than the SE NE SW Sec 8, T06N, R02E. Please amend the PD description or the map appropriately.

Please submit an amended application to allow final evaluation of the application to be completed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. Your response or a request for more time to seek the information must be received within the next thirty (30) days. The application will be voided without a timely written reply.

Please contact me at (208) 334-2190 if you have any questions or need additional information. Thank you for your attention to these matters. I look forward to your response.
