Re: Applications for Transfer for Oxford Mountain Ranch

Dear Agent,

Please find attached two Applications for Transfer for Oxford Mountain Ranch. One application proposes to update the ground water rights, more specifically to correctly identify the points of diversion, add a point of diversion, correct an erroneous period of use, and identify the correct permissible place of use. Water is also diverted from Pine Canyon Creek and is comingled with the ground water in an irrigation pond that is covered under the 24-hour rule. It is proposed in the second application to more clearly identify the point of diversion on the creek and to update the place of use to correspond with the permissible place of use of the ground water rights, which reflects the current practices.

In regards to the place of use legal description, let it be known that not all data rectified correctly in this area. The Public Land Survey System (PLS), as obtained from Michael Ciscell, does not correspond to the USGS Topographic Maps as they should; thus, the acreage per quarter-quarter may be in need of adjustment when and if the corrections to the PLS are made.

The water rights are currently under the name of John and Jayne Probst. It is proposed to have the ownership updated through the transfer process.

Sincerely,

A handwritten signature in blue ink that reads "Kristin Moore". The signature is fluid and cursive, with a long horizontal line extending from the end.

Kristin Moore
Water Rights Analyst
