

MEMORANDUM

Date: January 11, 2010
To: Water Right File 25-14238
From: Pam Skaggs 
Re: File Notes for Licensing

Permit 25-14238 was issued without identifying the tributary of the spring source. Also overlooked were standard conditions informing the right holder that this right is within Water District 01, and may in the future be required to install a lockable device on the system to provide watermaster suitable control of the diversion. These two items should be addressed at the time of licensing if beneficial use is developed.

I recommend that any subsequent license include the confirmed tributary of the spring source and condition R05 identifying Water District #01.
