Hi Jeff:

Ed Lawson is off to parts unknown. He will be back on the 7 Jan.

Our caretaker Cam Hair will be able to take care of the affidavit needed. He has been at the ranch daily during this whole horrendous process. He actually watched the system daily to make sure that all the values were either open or ramped down while trying to equalize pressure. THus, when Ed is back with us we will get the affidavit to you.

Let's finalize this thing. I know you have been working hard to get it done, and I appreciate that. Not an easy process.

Thank You.

P.S. "so we beat on boats against the current, borne back ceaselessly into the past." Wonderful last line in F. Scott Fitzgerald's, "Great Gatsby." As you know a contemporary of Ernest Hemingway. Everyone in Sun Valley idolizes Ernest.....I am partial to F. Scott and his introspection. Just finished a fiction class.....can you tell?

Again, thank you.

Ed,

I received the information about snowfall. Seems clear that there was snow in the area. As I indicated to Chuck in an earlier email, it would help support a finding of beneficial use if you could provide an affidavit or other type of evidence that there was accumulated snow at the place of use and the heated system actually melted snow. The field exam indicates that the system was not fully operational during the first snowfall event, so it would help to have more details and supporting information.

Jeff

Jeff,

Attached is a letter regarding the snow fall in October which will be mailed to you tomorrow.
