Re: Permit 95-09351

Dear Ms. Block,

Please find the following enclosed documents for your review:

- Check for the *License Examination Fee* (\$50)
- Completed *Statement of Completion for Submitting Proof of Beneficial Use*
- Completed *Change in Address* form
- Copy of our *Permit to Appropriate Water*
- 3 separate *Certificates of Occupancy* (and accompanying documents)

Our permit #95-09351 has lapsed. We acknowledge that the requirement for providing proof of beneficial use is stated as a condition of the permit. We overlooked this requirement but never received any letters (that were sent but returned) notifying us to fulfill this requirement. We used our existing address on all applications while our new plant was under development. By the time your notifications went out, all forwarding had expired for the old address as well as a forwarding message for the old phone numbers.

We have completed all development for this water right within the prescribed time but failed to file the proper paperwork with your office within the required time. We are respectfully requesting that our permit be reinstated and that our water right license be issued based on the enclosed information and the following explanations.

I have enclosed 3 separate *Certificates of Occupancy* (CO) for our facility, which are issued by Kootenai County when a building permit has been completed and all conditions have been satisfied, as proof of beneficial use within the prescribed time. The first (permit # 42753) is for our water storage tank, required for fire protection. The CO was issued on April 2, 2007, indicating that our water storage tank was completed and filled, as approved by the Fire Marshal. The other two CO's (#42752 & #42400) are for our office and pellet plant respectively.

These permits were reviewed and approved by Kootenai County under the 2006 International Building Code (IBC). Chapter 29, specifically Table 2902.1 requires that all habitable buildings have potable water in order to be occupied. This information can be verified by Bob Ankersmit, Kootenai County Plans Examiner at (208) 446-1040 or rankersmit@kcgov.us. We would not have been able to occupy without running water and required fire protection in place. Again, these CO's were issued within the prescribed time to prove beneficial use (April 2, 2007)

We welcome your examination of our facility, verifying this information and our continued use of this water. Please contact me with any questions or if you need anything in addition to what I have provided as proof of beneficial use.

Sincerely,

A handwritten signature in black ink that reads "Valerie Favicchio". The signature is written in a cursive, flowing style.
