C. L. "BUTCH" OTTER
Governor

GARY SPACKMAN
Interim Director

James:

Here are the two transfers which propose to add a point of diversion to water rights 74-341 (Transfer 75355) and 74-345 (Transfer 76164). In review of these water rights I found that one of the points of diversion legal description was not correctly describing the actual location of the point of diversion. These transfers will also change a point of diversion correcting that issue. A letter dated June 25, 2009 which you wrote explained your desire that these water rights be in both James and Paula's name. We could accomplish a name change for you for water right 74-341 while processing transfer 75355 however; we would require a recorded warranty deed with both you and Paula's name on it.

For transfer 76164 both you and Paula need to sign. Don't worry about getting the documents notarized we just need both signatures.

For transfer 75355 only you need to sign. Again, don't worry about getting the document notarized.

Earlier we discussed the filing fee which would be more since we are now filing two different transfers. You have already paid \$810 (see attached receipt) on the original filing of transfer 75355. An additional \$210 would be required for the processing of both transfers.

Please look over the transfers and maps for concurrence. If you have any questions feel free to call.

Thanks,

Blake Jordan
Water resource Agent, Sr.
