RE: Transfers 74306 and 74037 Barron Development

Dear Jennifer

I am finalizing my review of these transfers and I still have a problem with the point of diversion located in 2N, 3W, Sec 10, SENW.

Most of the information I have does suggest that it is indeed near the northeast corner of that quarter/quarter. However, the only record of an existing well in that area is associated with right 63-3597K held by Jessie Prather. That right's point of diversion is recorded as 2N, 3W, Sec 10, SWNE. If the point of diversion identified in the two transfers is indeed associated with the Prather well then either the Prather water right POD legal description is wrong or the transfer applications are wrong. Could you please clarify the actual location of the well in question?

The other requirement needed is a notarized letter from the holder of each lien, mortgage, or contract approving of the intent of the transfer. The application approval cannot be finalized without this documentation.

If you have questions you can reach me at the number listed above.

Sincerely

Kelly K Christensen
Sr Water Resource Agent
