APPLICATION FOR PERMIT

To appropriate the public water of the State of Idaho

Application filed for right to divert surface water into a small aesthetic pond in front of my home. The pond is approximately 1600 square feet and varies from two to six feet deep. I have a domestic well that serves my home and provides irrigation water for my lawn. The total surface area of the pond and my lawn is less than ½ acre. The unnamed stream is locally known as the J-2 Coulee. Water is diverted to my property via a ditch from this coulee (stream). My Twin Falls Canal Company shares are also delivered via this same ditch. During the non irrigation season, when the Twin Falls Canal Company no longer delivers my shares, water is diverted through this ditch to the pond and then returns to the stream below my property. Irrigation waste water from the neighbor's property to the east can also enter the pond via a buried pipeline from our property boundary.

11. Map of proposed point of diversion and place of use attached? ☒

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.
