

## MEMORANDUM

**Date:** December 08, 2009

**To:** File 47-7221

**From:** Pamela Skaggs 

**Re:** License and Transfer Approvals

---

Review of Right 47-7221 in the Snake River Basin Adjudication (SRBA) by department staff raised questions regarding the total rate of diversion for this right. I reviewed the water right file and found that there is ambiguity between the license and the transfer approvals regarding the full extent of the right.

The field examiner measured a diversion capacity of 10.2 cfs and Diversion to Storage use is authorized at that same rate. Review of Transfer 2601 also noted that the right should not be limited from the original intended uses and amounts. The total authorized diversion under this right is 10.2 cfs, limited to a total annual volume of 1896.4 af. The database has been corrected to reflect these amounts.
