

MEMORANDUM

Date: November 19, 2009
To: Transfer 69237
From: Michele Edl
Re: status

I received a phone call from Cornel Van Dam this afternoon. He was calling on behalf of the Riverside Village Homeowners and was interested in the status of this transfer. I told him that it was on my supervisor's desk for final review and that the homeowners association should be seeing an approved transfer very soon. I explained that the approved transfer will make their point of diversion legal.

He told me that he had not yet seen the backfile for their 2 water rights but he has received some assistance including copies of the transfer documents from Rex Barrie, Basin 63 Watermaster. Mr. Van Dam shared with me that this is a complex system of ponds and pipes and that many other folks benefit from this diversion point. He believes that Rex understands the system.

Mr. Van Dam is also looking into all available mechanisms to pay for the control works required by the watermaster. I suggested he connect with the Water Resource Board and investigate their loan program.
