WATER RIGHT NO. 63-9751
As Modified by Transfer No. 69237

CONDITIONS OF APPROVAL

1. This right does not grant any right-of-way or easement across the land of another.
2. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
3. The right holder shall maintain measuring devices at the point of diversion and at the point of discharge and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
4. Return flow is discharged into the Boise River via Riverside Creek in the NESE, S23, T04N, R01E.
5. Diversion and use of water is authorized only when flows in the Boise River warrant delivery of water under a date of priority of June 23, 1981. If this priority cannot be satisfied, diversion must cease unless:
 - a) the use is entirely non-consumptive and all water is returned to the river, or
 - b) the consumptive amount of water is replaced from another source or right which is deliverable. In such case, a determination of consumptive use must be made and an acceptable method of replacement must be approved by the department prior to delivery under another source or right.
6. The point of diversion for this water right is unsurveyed accretion land. The quarter-quarter description has been protracted from the adjacent public land survey.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Dated this 24th day of November, 20 09
